Abstract (en)
[origin: WO2019101940A1] The invention relates to a method for preparing peptides comprising the step of forming a peptide bond wherein at least one amino acid or peptide comprises a protecting group having a water-solubility enhancing group, and said forming of a peptide bond is achieved while an amino acid or a peptide is bound to a solid phase. The invention further relates to peptides comprising a protecting group having a water-solubility enhancing group being bound to the amino group and an activated or free carboxyl group.
