Abstract (en)

[origin: WO2019101414A1] The invention relates to a device (10) for clamping a stuffing box packing (28), comprising a plurality of clamping elements (32, 46), which press a stuffing box gland (26) against the stuffing box packing (28) and thus the stuffing box packing (28) against a higher-level assembly, wherein at least two clamping elements (32, 46) are connected to each other in such a manner as to transmit torque such that rotation of one of the clamping elements (32, 46) causes rotation of the other clamping element or the other clamping elements.
