Abstract (en)  
[origin: WO2019097467A1] In order to provide a method for installing a generic system with improved ease of installation, a method is proposed for installing a cooking system (10a-b) comprising at least one heating unit (12a-b) and at least one cooktop plate (14a-b) which defines at least one desired placement position (16a-b) for at least one placement item (18a-b). In said method, during the orientation of a position of the heating unit (12a-b) relative to the desired placement position (16a- b), at least one orientation parameter is at least semi-automatically determined and is taken into consideration during the orientation of a position of the heating unit (12a-b) relative to the desired placement position (16a- b).
