Abstract (en)
[origin: WO2019101315A1] The present invention relates to a device (1) which comprises a controllable valve (2) for sanitary facilities, heating systems or air conditioning systems, a control unit (3) which controls the valve (2), and a sensor which is connected to the control unit (3). The sensor is a light sensor (4) which can detect a light signal (7) from visible light, convert said light signal into a sensor signal (17) specific to said light signal, and transmit said light signal to the control unit (3). The control unit (3) is designed to control the valve (2) on the basis of the specific sensor signal (17).
