Abstract (en)

[origin: WO2019101687A1] The invention relates to a switch device with at least one switch element (7) actuated by a cam of a camshaft (3). The switch device is distinguished in that the cam is formed as a three-dimensional cam (4) and in that the at least one switch element (7) is arranged so as to be displaceable substantially parallel to an axis of the camshaft (3) in order to adjust a switch point.
