Abstract (en)

[origin: WO2019105627A1] The invention relates to a means of transport (10) having at least one wheel (12), which is driven by means of an electric motor (14). The electric motor (14) is part of the means of transport. It furthermore comprises a brake (16) for braking the wheel (12) and/or the motor (14), wherein the brake (16) has an actuating means (18). The motor is supplied by an energy store (20). According to the invention, the energy store (20) is fixed to the actuating means (18).
