Abstract (en)

[origin: WO2019106504A1] The invention regards a station for filling (1) cartridges (P) of electronic cigarettes, comprising: feeding means (2), set in a feeding area (Z1) for feeding cartridges (P) of electronic cigarettes to be filled; filling means (3), set in a filling area (Z2), downstream of the feeding area (Z1), for filling the cartridges (P) of electronic cigarettes; and a transfer device (4), set between the feeding means (2) and the filling means (3), for receiving from the feeding means (2) the cartridges (P) of electronic cigarettes to be filled and transferring them from the feeding area (Z1) to the filling area (Z2). In particular, the transfer device (4) comprises: a first transfer sector (41) and a second transfer sector (42), which are pre-arranged for receiving from the feeding means (2), respectively, first cartridges (P1) and second cartridges (P2) of electronic cigarettes to be filled and transferring them into the filling area (Z2). The first transfer sector (41) and the second transfer sector (42) are mobile in rotation about an axis (H), independently of one another, at a reception speed (w1) when they are in the feeding area (Z1), at a filling speed (w2) when they are in the filling area (Z2), and at a transfer speed (w3), higher than the reception speed (w1) and the filling speed (w2), when they are between the feeding area (Z1) and the filling area (Z2).
