Abstract (en)

[origin: WO2019106699A1] The invention relates to a composition of cement, applicable substantially in the building field with the function of self-levelling screed both for internal and for external environments, with remarkable mechanical strength and with excellent quality of acoustic insulation and thermal conductivity, for the consecutive laying of tiles, parquet, linoleum, resin or equivalent materials, and it also relates to a process for manufacturing this composition of cement. There are described in detail all the used materials, that are mixed to each other, and the maximum and minimum quantities of the same materials, and their modality of mixing.
