Abstract (en)
[origin: WO2019106062A1] The present invention relates to a device (10, 10') for applying at least one grout colorant, with at least one main body (12, 12'), with at least one discharge device (14, 14', 14'') for discharging the grout colorant and with at least one storage container (16, 16'), which is at least partially filled with the grout colorant, wherein the discharge device (14, 14', 14'') is attached to the main body (12, 12') and is fluidically connected to the storage container (16, 16'), wherein the discharge device (14, 14', 14'') has for the controlled discharge of the grout colorant at least one discharge component (18, 18', 18''), which is movable in relation to the main body (12, 12') during the discharge of the grout colorant and by means of which the grout colorant can be applied to a surface (20), in particular a tile grout (20).
