Abstract (en)
[origin: WO2019101495A1] The present invention concerns a housing (1) comprising a first compartment (2) suitable for receiving a first device (3), where appropriate associated with a first display, said first compartment (2) being delimited by at least a first wall (21) delimiting a first opening (22) and a first bottom (23) secured to or suitable for being secured to said first wall (21). The housing (1) comprises a second compartment (4) that is removable from the first compartment delimited by at least a second wall (41) and a second bottom (42) secured to or suitable for being secured to said second wall and extending in or parallel to a plane (P2) forming an obtuse angle (β) with an extension plane (P1) of said first wall and/or said first bottom.
