Abstract (en)
[origin: EP3718430A1] A method of making a decorative element for use in an invisible setting is disclosed. The decorative element comprises a presentation portion, a base and a setting portion extending between the presentation portion and the base, wherein the setting portion comprises an anchoring feature. The method comprises providing a mould arrangement comprising a mould comprising a presentation surface for forming the presentation portion of the decorative element and a setting surface for forming the setting portion of the decorative element, and a former for forming the anchoring feature, the former being located adjacent to the setting surface. The method further comprises arranging an element-forming material into the mould to surround the former and performing a heat treatment to form a decorative element with an anchoring feature.
