Abstract (en)
[origin: WO2019110424A1] The invention relates to a media application device, in particular to a colorant application device, comprising at least one media dispensing unit (12a; 2b; 12c) for dispensing at least one medium onto at least one surface (14a; 14b; 14c), and at least one electronics unit (16a; 16b; 16c), at least for closed- and/or open-loop controlling the media dispensing unit (12a; 12b; 12c). According to the invention, the media application device comprises at least one object sensor unit (18a; 18b) for sensing an object-specific characteristic variable, the electronics unit (16a; 16c) closed- and/or open-loop controlling the at least one media application device (12a; 12c) in accordance with the characteristic variable.
