Abstract (en)

[origin: WO2019110339A1] The invention relates to a hand-held power tool comprising a housing (110), in which a drive motor (120) and a transmission (150) that can be driven by the drive motor (120) in order to drive an output shaft (205) are arranged, wherein a mode-setting device (160) is provided which has at least one rotatable actuation element (240) for setting an operating mode, a torque-adjusting element (220) for adjusting a torque, and a gear changing element (230) for changing gears of the transmission (150). The torque adjusting element (220) and the gear changing element (230) are releasably coupled together during a gear changing process.
