Abstract (en)

[origin: WO2019110661A1] The invention relates to a vacuum table (7) of a machine which processes a tabular substrate, wherein the vacuum table (7) has suction openings (25) which are arranged in rows and columns and are connected to a vacuum generator. A plurality of rows of suction openings (25) are assigned in each case slides (26) for opening and closing the suction openings (25) and/or a plurality of columns of suction openings (25) are assigned in each case slides (27) for opening and closing the suction openings (25).
