Abstract (en)
[origin: WO2019111171A1] The invention relates to the metalware 30 for a window 20. The metalware includes: a strip 32 to be mounted on the window; a rod 34 slidable on the strip; and a locking pin 36 mounted on the rod and comprising: - a body 360 having axis s, - a tang 364 which extends from the body and has axis t, and - a prismatic portion 362 between the body and the tang. According to the invention - the axes s and t are parallel and spaced; - the section of the prismatic portion is a polygon centred on the axis t; - the tang is rotatable on the rod around the axis t; - the strip includes a slot 320; - the prismatic portion is included in the slot; and - the body protrudes from the strip. The window comprises a fixed frame 22 and a movable frame 24 comprising a strut 240 with the metalware.
