Abstract (en)
[origin: WO2019110356A1] The invention relates to an actuator (1) for a motor vehicle clutch system, the actuator (1) comprising an electric motor (4) housed in a frame (5), a reduction gear mechanism connected to the electric motor, a casing (2) receiving the reduction gear mechanism and a cover (3) intended to be fixed to the casing (2), at least one element among the frame (5), the casing (2) and the cover (3) is made up of and/or is covered by a laminated composite material (10, 20) comprising at least two layers of material and of which at least one of the layers is made of a viscoelastic material.
