Abstract (en)

[origin: WO2020207797A1] The invention relates to an arrangement of components in a portable wet vacuum cleaner, said wet vacuum cleaner comprising a container for collecting a liquid-dirt mixture. The arrangement of components is characterised in particular by an inclined sealing plane as the top closure of a collection container of the wet vacuum cleaner, said inclined sealing plane comprising a filter unit. In a second aspect, the invention also relates to a wet vacuum cleaner that comprises such a component arrangement.
