Abstract (en)
[origin: CA3076124A1] Lock device (1) for a waste receiving device (2) comprising a container (3) and a cover (5) held on the container (3) and a waste receiving device having such a lock device. The lock device (1) comprises an upper lock part (7) to be fastened on the cover side and a lower lock part to be fastened on the container side. The upper lock part (7) has an upper lock part housing (9), a locking mechanism (9) and a first locking element (11). The lower lock part has a lower lock part housing (26) and a second locking element (30). The second locking element (30) is pivotable about a swivel axis (29) between a blocking position and a release position. In its blocking position, the second locking element (30) cooperates with the first locking element (11) in such a way that the cover (5) is blocked.
