Abstract (en)
[origin: US2020325424A1] A solid particulate composition including, based on the total weight of the composition, a) 20 to 95 wt. % of at least one water-soluble carrier material selected from hydrous salts of which the water vapor partial pressure corresponds, at a specific temperature in the range from 30 to 100° C., to the H₂O partial pressure of the saturated solution of salt; b) 0.1 to 20 wt. % fragrance; and c) 0.1 to 30 wt. % of at least one textile-care compound. The invention further relates to the use and a method for the preparation of a solid particulate composition.
