Abstract (en)

[origin: CN111793886A] The invention relates to a gripping mechanism for a device for introducing an insert into a knitted fabric, the device is used for guiding an insert into the knitted fabric manufactured on the flat knitting machine. The knitting inserts can be received from a tank, can be moved into comb gaps between needle beds of the flat knitting machine, and can be introduced into the knitted fabric produced on the flat knitting machine. The gripping device (50) comprises a gripper (51) and a removal device (53).
