Abstract (en)
The present invention provides a handheld lamp, preferably a handheld LED lamp, including an illuminant end (1) and a handle end (2) which are connected to each other, wherein the handle end (2) is provided with a battery and a switch (4) connected to the battery, the illuminant end (1) is provided with a main body (11), a light source (121) is mounted on the upper side of the main body (11); a matching portion (113) is provided in the lower part of the main body (11), wherein the matching portion (113) is so structured that two matching portions (13) of two handheld lamps can match with each other and can be assembled together. Thereby, the effect of omnidirectional illumination is achieved.
