Abstract (en)  
[origin: WO2019057318A1] The invention relates to a portable grill device (100) having at least one substantially vertically oriented, planar heat source (110), at least one carrier (120) for food to be grilled, said carrier being arranged in front of the heat source (110), at least one drive unit (130) for rotating the at least one carrier (120) for food to be grilled about a substantially vertical axis of rotation (DA) and an energy supply (140) for supplying the drive unit (130) with the energy needed for the operation thereof. The portable grill device (100) comprises at least one adjusting unit (150), which is designed to continuously adjust a distance between the at least one heat source (110) and the at least one carrier (120) for food to be grilled while the grill device (100) is in operation.
