Abstract (en)

[origin: WO2019116263A1] The present invention relates to a packaging apparatus (1) comprising a frame (3), a lower tool (2) engaged with the frame (3) and configured for receiving one or more supports (4), an upper tool (6) configured for engaging a film portion (5a) with at least one support (4). The upper tool (6) is movable, upon action of a movement device with flat kinematic system (69), between a first position in which it picks up a film portion (5a) from a supplying station and a second position in which it fixes the film portion (5a) on a support (4) housed by a lower tool (2). The present invention also regards a packaging process using said apparatus (1).
