Abstract (en)
[origin: WO2019115895A1] The ironing equipment comprises an iron (3) comprising a heating body (14), the heating body (14) comprising a main steam-production chamber (18) used for routine ironing, and a secondary steam-production chamber (19) supplied with liquid at discrete moments in time in order to obtain additional steam, the main steam-production chamber (18) being supplied with liquid when a user actuates a steam control member (27) borne by the iron (3) in order to obtain a continuous stream of steam. The secondary steam-production chamber (19) is supplied with a predetermined quantity of water each time the steam control member (27) is actuated.
