Abstract (en)
[origin: WO2019115445A1] A system to record information about events is disclosed, in which at least one image source is adapted to provide a series of photographic images of a field of view to a processing unit, the processing unit is adapted to identify and locate a marker within one or more photographic images provided thereto and provide a location of said marker relative to the field of view, and the processing unit is further adapted to derive and record a translation of said marker within the field of view between two or more images comprising the said series of images.
