Abstract (en)

[origin: EP3726354A1] The invention relates to an onboard terminal device, a display control method, a display control apparatus, a computer device, and a recording medium. The onboard terminal device comprises: a display configured to provide a plurality of display interfaces; and a controller configured to compare, in response to an instruction for newly adding a display interface from the plurality of display interfaces for displaying, a hierarchical attribute of a predetermined current display interface with a hierarchical attribute of the display interface to be newly added, and perform, based on the result of the comparison, a corresponding operation on the current display interface and the display interface to be newly added.
