Abstract (en)

[origin: WO2019122135A1] A method for the manufacture of a whipped cream composition is disclosed. It comprises the steps of: preparing a cream composition comprising between 15 wt% and 40 wt% of fat by mixing a milk-based component, a cream component, an optional stabilising system and a protein/fat weight ratio between 0.05 and 0.35; adjusting the pH of the cream composition between 5.7 and 6.5; heat-treating and sterilising the cream composition, cooling it, and then storing it for a period of from 4 to 10 hours; and then, aerating the heat-treated cream composition to obtain a whipped cream composition having an overrun of from 100% to 200%. A whipped cream composition, and a food product comprising the whipped cream composition are also disclosed.
