Abstract (en)  
[origin: WO2019126676A1] An endoscope/triplescope ( combined gastroscope, bronchoscope, laryngoscope) device and/or system includes an endoscope having an outer diameter of less than about 4.0 millimeters, in particular less than about 3.5 millimeters, that allows high resolution viewing having a distal element including an optical element that allows four way tip deflection. Further, the device may include a scope stiffening apparatus to minimize the endoscopes flexibility when needed, a foot and hand activation to allow air/water insufflation and image/video capture, a light source, an interior conduit having a diameter greater than about 2 mm, one or more sensor arrays, audio elements for transcription of report, sensors to measure body cavity findings.
