Abstract (en)

[origin: WO2019122102A1] The present invention relates to a cosmetic composition in the form of a direct emulsion comprising: •at least 10% by weight of water relative to the weight of the composition; •at least 10% by weight, relative to the weight of the composition, of at least one silicone resin; •at least one aqueous dispersion of particles of at least one film-forming polymer chosen from synthetic polymers of radical type or of polycondensate type, and mixtures thereof; •optionally, at least one hydrocarbon-based or silicone volatile oil, in a content such that the silicone resin/volatile oil(s) weight ratio is greater than 1. The invention also relates to a process for making up and/or caring in particular for keratin materials such as the skin or the lips, and preferably the lips, in which the abovementioned composition is applied.
