Abstract (en)

[origin: WO2019121489A1] The present invention relates to a device for the powder coating of objects, which comprises a main body (11), on which an electrode arrangement (12) designed for producing a powder cloud (20) is arranged and on which a metering device (14) is arranged above the electrode arrangement (12) and is designed for the controlled discharge of an amount of powder onto the electrode arrangement (12). Also provided is a powder coating installation (100) that is equipped with at least one such device for powder coating (10).
