Abstract (en)
[origin: WO2019121965A2] The invention relates to a value document, such as a banknote (1), a cheque, a credit card or other payment card, an identification card or the like, which has a front side (9) and a back side (10), displays an image (3) that is recognizable by the unaided eye in the top view at least from the front side (9), has specific dimensions (B, H) in the top view, and has a substrate body (2) which, in the top view, has the specific dimensions (B, H) and is structured by at least one transparent film (11, 12) which also has the specific dimensions (B, H) in the top view. According to the invention, the image (3) that is recognizable from the front side (9) is produced by a first embossed structure (14), which is metallized at least in sections and which is arranged on one side of the first film (9) and which has a lateral, i.e. crosswise to the top view direction, varying profiling and/or metallization, wherein the first embossed structure (14), which is metallized at least in sections, is formed on a front side of the film facing the front side, and a second embossed structure (14), which is metallized at least in sections, is formed on a back side of the film facing the back side (10), and at least one of the metallized embossed structures (14) is covered with a leveling cover layer (22).
