Abstract (en)
[origin: WO2019122546A1] The invention relates to a rubber composition that is based at least on a reinforcing filler comprising a carbon black and on a natural rubber modified insofar as same contains pendant groups of formula (I) in which the symbols Y1, Y2, Y3 and Y4 are identical or different and represent an atom or a group of atoms, with the proviso that at least one of the symbols designates an attachment to an isoprene unit in the modified natural rubber, the carbon black amounting to more than 50% by weight of the reinforcing filler.
