Abstract (en)
[origin: WO2019122185A1] The invention relates to a surfboard comprising a deck (17) and an electric drive for the surfboard (2), wherein one end of a cable (7) is secured to the nose (4) of the surfboard (2) and the other end of the cable (7) has a handle (8). The drive is connected to a controller (21) which comprises a receiver (25) of a wireless remote control, and the handle (8) has a gas lever (23) which is connected to a transmitter (24) of the wireless remote control so as to transmit data, said transmitter (24) being arranged in the handle (8). By actuating the gas lever (23), control signals can be generated which can be transmitted by the transmitter (24) in the form of wireless signals and which can be received by the receiver (25) and converted into control values for the drive by the controller (21). The other end of the cable (7) is releasably secured to the handle (8).
