Abstract (en)
[origin: WO2019120958A1] The invention relates to a method for producing aesthetic meltable objects, involving producing a melt dispersion that comprises at least one water-soluble or water-dispersible carrier material and at least one solid material in a first container; and mixing the melt dispersion that was obtained in this manner with at least one aesthetic element, and shaping the melt dispersion that was obtained in this manner so as to produce solid meltable objects that contain an aesthetic element. The present invention also relates to the meltable objects produced in this method, to a detergent or cleaning agent containing same, to the use of such a detergent or cleaning agent for cleaning textiles or hard surfaces, and to corresponding methods for cleaning textiles or hard surfaces using such a detergent or cleaning agent.
