Abstract (en)

[origin: WO2019120598A1] The invention relates to a motor vehicle door handle arrangement for actuating a door lock and/or door of a motor vehicle, with a handle housing (1) and an actuating element which is arranged in or on the handle housing (1) and, when actuated by a user when the door lock is unlocked, permits opening of the door, wherein the motor vehicle door handle arrangement has an operating module (10), wherein a button as actuating element for actuating a microswitch (14), and the microswitch (14) and a connector (15) for producing an electrical connection of the microswitch (14) to the door lock are arranged in the operating module (10).
