Abstract (en)  
[origin: WO2019121868A1] The invention pertains to a connecting assembly comprising a first part (001) and a second part (003), whereby the first part is connectable with the second part via a form-fit and/or a material- locking connection and whereby the connecting assembly comprises an adhesive material (002) for an adhesive connection from the first part and/or the second part to a third part (004) is proposed which assembly wherein the first part, the second part and/or the third part comprise at least one cavity (005) on a surface area A<sub>total</sub> of the first part, the second part and/or the third part, whereby the adhesive material is located in the at least one cavity on a cavity surface area A<sub>c</sub> and the cavity surface area A<sub>c</sub> of the at least one cavity is less than 95% of the surface area A<sub>total</sub> of the first part, the second part and/or the third part.
