Abstract (en)

[origin: WO2019121300A1] The invention relates to, in particular, a system for the open-loop and/or closed-loop control of one or more household appliances, said system comprising at least one household appliance, at least one interface unit arranged in a household and providing an interface for communication, and at least one server which provides a service, the at least one household appliance being at least partially controllable in an open-loop and/or closed-loop manner via the at least one interface unit and/or via the at least one server. The invention also relates to a method for the open-loop and/or closed-loop control of one or more household appliances, and a device for carrying out the method according to the invention.
