Abstract (en)  
[origin: US2020340262A1] A rolling-unrolling device for a protective cover for covering a surface to be protected is presented. The device is self-propelling and includes a braking system for blocking the rotation of at least one drive wheel of the carriages and causing the cover to be automatically tensioned during the rolling up thereof on the roller tube. This braking system includes a movable pawl integral with each of the carriages, and a ratchet wheel integral with the drive wheel of each of the carriages, such that, in the direction of rotation corresponding to the unrolling of the cover, the pawl is not engaged with the ratchet wheel and the braking system is in the passive position, and in the opposite direction of rotation corresponding to the rolling up of the cover, the pawl is engaged with the ratchet wheel and the braking system is in the active position.

Abstract (fr)  
L'invention concerne un dispositif enrouleur-dérouleur d'une bâche de protection pour couvrir une surface à protéger, ce dispositif étant autottracté et comportant un système de freinage (100) pour bloquer la rotation d'au moins une roue motrice (15, 16) des chariots (5, 6) et provoquer une mise en tension automatique de ladite bâche pendant son enroulement le tube d'enroulement dudit dispositif.
