Abstract (en)

[origin: EP3730843A1] A method for adjusting a control policy of a cooker hood and a cooker hood are provided, where an operation mode of the cooker hood includes a manual mode and an automatic mode, and in the automatic mode, the cooker hood automatically controls a rotational speed of a fan according to a sensor parameter. The method includes: when the cooker hood operates in the automatic mode, obtaining a quantity of times of up shifting and/or a quantity of times of down shifting that a user manually adjusts a gear of the cooker hood; and adjusting a control parameter of the cooker hood in the automatic mode according to the quantity of times of gear shifting. In this way, an automatic control parameter of the fan is adjusted according to sensitivity levels of different users to the kitchen environment, thereby improving user experience.
