Abstract (en)
[origin: WO2019129874A1] - The invention concerns a hair-styling apparatus (1) designed so as to be gripped and handled by hand and comprising a main body (2) that carries at least one motorised roller (3) mounted so as to be able to rotate relative to the main body in order to cause a lock of hair (<u>C</u>) to be styled to move by friction relative to the main body (2), said hair-styling apparatus (1) being characterised in that said main body (2) also carries guide means (5) for guiding said lock of hair (<u>C</u>) arranged relative to said motorised roller (3) to keep said lock of hair (<u>C</u>) pressed against said motorised roller (3) according to an angular contact sector (α) of at least 30°.
