Abstract (en)

[origin: WO2019180044A1] The invention relates to a laboratory apparatus system comprising at least one laboratory apparatus (1), at least one sample receiving element (2), and at least one heat transfer device (6, 7, 9, 15, 20) for supplying and/or dissipating thermal energy to or from the sample receiving element (2). The heat transfer device produces a heat transfer between the sample receiving element (2) and the laboratory apparatus (1) and/or a temperature-controlling device (22) provided outside of the laboratory apparatus and/or a heat and/or cold source provided outside of the laboratory apparatus.
