Abstract (en)
[origin: WO2019129813A1] The invention relates to a device for parking a plurality of vehicles or the like above one another, wherein at least one platform is provided, which can be raised and lowered by a lifting device, and a constant velocity traction element is provided on each side of the platform. Each constant velocity traction element is guided at least through a roller on the platform and the rollers of two constant velocity traction elements are connected for rotation by a constant velocity shaft.
