Abstract (en)

[origin: WO2019129448A1] In a method for operating a tamping assembly (8) of a track construction machine (1), the track construction machine (1) together with the tamping assembly (8) is first provided on a track bed (19). At least one part (18, 24) of the tamping assembly (8) is accelerated, at least one measurement variable which correlates to the acceleration is detected by a sensor, and the state of damage of the tamping assembly (8) is ascertained by an analysis unit using the at least one measurement variable.
