Abstract (en)
[origin: WO2019129441A1] The present invention relates to an oven (1) comprising an oven cavity wherein the foodstuffs to be cooked are placed, that has two parallel walls; two rack supports (2) that are oppositely disposed on the walls and that has one or more than one guide wire (6) arranged at different heights predetermined by the producer and extending parallel to each other horizontally on the same vertical plane and at least one upright element (9) enabling the guide wires (6) to be fixed to each other and extending perpendicular to the guide wires (6); and at least two telescopic rails (5) that are seated onto the rack supports (2) and that support the trays placed into the oven cavity.
