Abstract (en)  
[origin: EP3733297A1] Disclosed is a massage shower head, comprising a body (1), a water outflow surface cover (2) and a plurality of massage balls (3). A water inlet (11) is provided in the body (1), a front face of the body serves as a water outflow side, the water outflow surface cover (2) covers the water outflow side of the body (1), the massage balls (3) are movably assembled between the body (1) and the water outflow surface cover (2), openings (25) are provided in the water outflow surface cover (2), and the massage balls (3) partially protrude out of the openings (25). Providing the massage balls in the water outflow side of the shower head realizes a massage function during washing, thereby achieving a rub-down effect.
