Abstract (en)
[origin: EP3734278A1] The present invention relates to a system for acquiring information on a target protein in a sample by detecting the target protein expressed in an immune cell such as a macrophage with high accuracy, the information acquisition system including a step (A) of staining a first immune cell protein, a step (B) of staining a second immune cell protein, a step (C) of staining the target protein, and a step (D) of measuring, after the steps (A) to (C), a signal derived from the target protein.
