Abstract (en)

[origin: WO2019134883A2] A cartridge (15) of an e-vaping device (10) includes a housing (50) extending in a longitudinal direction, a reservoir (5) in the housing (50), a heater (115') in the housing (50), and an absorbent material (1960). The reservoir (5) is configured to store a pre-vapor formulation. The heater (115') has a sinusoidal shaped member (1620) translating about an elliptical shape to define a channel therethrough. The absorbent material (1960) at least partially surrounds the sinusoidal shaped member (1620). The absorbent material (1960) is in fluid communication with the reservoir (5).
