Abstract (en)

[origin: WO2019158258A1] A gritting device is disclosed, in particular for a rail vehicle, for providing a gritting material in a wheel-rail gap, having at least one gritting material line for transporting the gritting material from a gritting material container to a gritting material outlet, wherein the gritting device has a distributor element for splitting a first gritting material line into at least two second gritting material lines, wherein an opening of the distributor element for receiving the first gritting material line is connected to the gritting material container. A rail vehicle is also disclosed.
