Abstract (en)
The present invention is a handle and/or lock fastening system intended for doors and/or windows, or the like, the main feature of which is how quickly a handle can be placed on one of the aforementioned elements. The fastening system object of the present invention consists of rosettes (10) (3) which receive between them a main shaft (9) of a handle (1) or a lock, as well as of buttresses (4) (5) for fastening the handle (1) and/or lock. These rosettes (3) (10) rotate in the buttresses through intermediate plastic grooves (6) (7). The rotation of the locking rosettes is made with the aid of the mounting wrench (8).
