Abstract (en)  
[origin: CN111915814A] The invention relates to a device for handling notes of value, and the device comprises a sensor unit (42) for detecting at least one feature of a least one note of value (28) to be dispensed. A control unit (44) distinguishes depending on the feature detected by the sensor unit (42) whether the at least one note of value (28) is a first note of value (48) that is approved for withdrawal or a second note of value (50) that is not approved for withdrawal and activates a switch unit (46) such that the at least one note of value (28) is fed to an intermediate storage (52) when it is a second note of value (50). The intermediate storage (52) comprises a transport unit which is drivable in a first direction (T7) for feeding the second note of value (50), and which is drivable into a second direction (T6) such that the second note of value (50) can be conveyed out of the intermediate storage (52).
